Capabilities Statement

For over 25 years, BossNine Technologies has helped organizations manage and support their mission-critical technology systems. We assist companies with new or aging systems, on-premises or in the cloud. We have the unique capability of managing the process from end to end, combining superior skills at reasonable rates. Our services include; Linux/Open Source services, cloud assessments, cloud support, cloud security assessments, cloud migrations, and technology support.

At BossNine Technologies problems are proactively prevented. We do this through a team of skilled and highly experienced individuals who are trained to get to the deeper core issues to provide solutions that positively impact your bottom line. No matter what type of technology you have, at BossNine we are here to help. We offer services for Linux/open-source technology, data center infrastructure implementation, cloud services, DevOps, and overall technology support.

Core Competencies

- Linux Technology Services
- Cloud Assessments
- Cloud Migrations
- Cloud Security
- Hybrid Cloud Integration
- Dev/Ops
- Open Source System Services
- Technology Support

Differentiators

We have been around for over 27 years, we have a deep knowledge and understanding of legacy Linux/Open Source systems that we apply to modern technology and implementing hybrid environments. Most companies today, look at the new as a better alternative. We believe legacy systems and the latest cloud technology can be leveraged for efficiency.
